Senior Associate Pavlos Mundis is a member of the firm's litigation department and has considerable experience in banking and financing law, in addition to company and banking litigation.

Pavlos advises on a range of issues including corporate capacity, authority and proper execution, the perfection and enforcement of securities and regulatory compliance. He has been heavily involved in the areas of international business, compliance, project finance, syndicated lending and property law. He deals with drafting and updating standard or tailored made legal documents, such as credit facility agreements, security agreements (i.e., pledge, lien and assignment agreements), escrow agreements, syndicated loan agreements and terms and conditions of the use of debit and credit cards.

Prior to joining the firm, he worked for seven years in the Legal Department of the largest bank in Cyprus.

Banking & Secured Financing

Pavlos advises on matters regarding the Cyprus regulatory framework and corresponding EU directives and regulations on banking law. He particularly advises on debt restructuring and on the new legislation for the acquisition of credit facilities, the new regulatory framework on foreclosures and the procedure for the resolution of non-performing loans. He also assists Authorised Financial Institution with amending their Consumer Credit Contracts, securities documents, framework contracts, credit card agreements and terms of use of electronic banking, in order to comply with Consumer Credit laws, the Liberalisation of the Interest Rate and Related Matters Law (160(I)/1999), the Credit Granting and Review Processes Directive of the Central Bank of Cyprus, the unfair terms in Consumer Contracts Law 93(I)/1996, the Directive (EU) 2015/2366 of the European Parliament of the Council on payment services in the internal market, and Regulation (EU) 2016/679 of the European Parliament and of the Council on the protection of natural persons with regard to the processing of personal data and on the free movement of such data.
